CONCEPT

In no more than 100 words, summarise readers will be able to do after they've read this Codex.

We're looking for specific and meaningful skills or competences that readers will acquire. An example of what we **are** looking for is:

"Readers will be able to critically appraise a paper at their interview for the Academic Foundation Programme." An example of what we're **not** looking for would be: "Readers might get a better understanding of clinical medicine."

In no more than 300 words, summarise the scope and structure of this Codex.

We're looking for a clear vision of the content and scope of the Codex. This is by no means final, but please give an indication as to the scope and depth that you'll be providing. If you're successful, we'll invite you to submit a draft chapter in the next few weeks.

INSIGHTS

In no more than 100 words, tell us about who'd be interested in buying this Codex.
